10	5	13	7,4	18,8

**Stronger by sitting/Stronger by standing!**

# Combination of Back App Chair and Back App 360. Results from field trial in Finland 2017

## Conclusions

Results from the field trial confirm results from scientific studies regarding effects on the lower back

Results from the field trials suggest that the positive effects on the lower back also can be found in the upper back and in the neck

The field trial results suggest positive effects also on headaches

The positive effects on surplus energy (exhausted after work and fitness for work) have been difficult to study in scientific studies. Back App will follow up the results with scientists in order to document the effects in scientific experiments

**Stronger by sitting/Stronger by standing!**
